2010 Lean Six Sigma Rewards and Recognition
November 17, 2010

The Team Precision Public Company Limited has successfully held Lean Six Sigma Rewards and Recognition on November 17, 2010. The event is purposed to enhance the communication, sharing, promoting, recognize and thank you all employees that always support and keep Lean Six Sigma in mind.

Speech and Opening from VP of Operation

Although the electronics industry is beginning to show signs of growth and customers still require and overall value from their EMS partners. In response to this, several of EMS (Electronics Manufacturing Services) companies employ various operations processes and methodologies to eliminate any unnecessary and costly steps in order to make their operations as efficient and defect free as possible.

Combining the Lean and Six Sigma will be creates a powerful set of tools to monitor and validate project progress, while also increasing value and minimizing variation in operations.

Keynote opening speech:

- Customers are important.
- Speed, quality, and low cost are linked.
- You need to eliminate variation and defects, and focus on process flow, if you want to deliver quality, speed, and low cost.

Keynote close speech from Chairman

Key word: Analytical Thinking and Teamwork

- Data is critical to making sound business decisions.
- Culture change management concepts, data driven, results driven.
- Teamwork: People have to work together to make the kinds of improvements by brainstorming, listen and respect others ideas.

Group Photo: Thumbs up-We are in the same team and same direction.

Finally, I would like to say thank you to all managements for a very great support .If without this, The 2010 Six Sigma Rewards and Recognition will not happen. The most importance is Lean Six Sigma colleague, I have to say thank you very much for your good attention and corporation. I realized that this year we have a lot of activities but you guys still keep focus and try to complete projects on time. Thank you very much and congratulations to everyone.

Thank and Regards
Kullawat Chookaew
Lean Six Sigma Department Manager
